

Bonnie and Clyde, 3 month old siblings arrived at the shelter in January 2014, frightened and completely unsocialized. They wanted nothing to do with anyone! It took quite some time for shelter staff to gain their trust, just to be able to feed them without incident. After a great deal of patience, TLC and time, Bonnie and Clyde finally settled in and learned to trust people. Almost 7 months to the day after their arrival, all the hard work and effort paid off - Bonnie and Clyde got adopted together! We are very pleased to have received an update and some photos of Bonnie and Clyde living it up in their forever home.

These two are a prime example of what can become of feral cats if they are rehabilitated early on. Give a special needs or feral feline a chance and you will be rewarded ten fold with unconditional love!
