

Hey,

I just wanted to send your our happy tails story!

My husband and I adopted Midnight and Daisy who we renamed Chloe and Oliver.

We were adding them to our little family with our other cat Stella and 13 year old dog Angel. The first few days were about getting use to these two rambunctious kittens.

We have always rescued animals and we will continue to do so!

After a few weeks we started seeing their personalities come out and they have been the best addition to our crazy family.

We may not have children yet but this house is never quit and always hear four sets of Paw's running around playing.

Thank you to the humane society for all that you do. You made it so easy to find the perfect pet to adopt into the family. No pressure, take your time approach.
