

Our cat Cici aka "snail", a long haired Calico was adopted to our home after our 14 year old nebelung (long haired Russian blue) named moe who came from the shelter so many years ago, passed away in January due to liver disease. Her twin brother Boo who still lives with us was very lonely so I took a trip to the shelter to find him a friend. I found many cats to cuddle but none seem to fit until I took " Snail " in my arms. She had matted fur and was a bit messy looking. She had been found near the highway by St Joes island and I knew she needed us! She's still quite shy but loves being an indoor, very loved comfy kitty for many years to come. :) Boo is behind Cici in the picture and even though he's 14, he acts as though he's still a kitten. The kitten behind Cici's tail is our newest addition. Her name is popcorn aka " sage" because she loves to eat popcorn! She is barely visible in the picture with Boo and Cici but she fits right in with the two other cats! Baby popcorn likes to sleep on her back most of the time. She is a tortoise shell. Popcorn loves to get into mischief and wear sunglasses!
