

Hello! I adopted a chinchilla from there a few months back. She fits right in with us. She has a huge cage with 5 different levels and all kinds of toys and tunnels . She has become best friends with our giant dog. I named her gidget . She loves scratches and treats and of course her dust baths. She had a patch of fur missing when I got her, it's growing back in nicely . She's very happy and social :) thanks for letting me adopt her !
