

We adopted our tuxedo cat Gypsy (Jo-Lee) in February 2019. We narrowed it down to two kitties and went home to discuss, however after a short chat it was clear Gypsy was the one for us. We immediately drove back to the Humane Society before anyone else could scoop her up. After filling out the paperwork, the last thing I did was put the 'Adopted' sign in front of her cage (she still had to be spayed). That was a great moment.

The easiest way to explain it is that Gypsy was made for us and we were made for Gypsy. She is cuddly, funny, furry, purr-y and excellent in every way. We discovered she has food allergies and environmental allergies and are working with our amazing vet to get her to optimum health. She sleeps in her usual chair most of the day and watches the street, squirrels and birds from the various cat trees and perches around the house. In the spring and summer we have a harness and leash and bring her outside for supervised outdoors time (she can be a scaredy cat). In April 2020, we adopted a male kitten from NCIN and Gypsy and Winston are now best buddies!

The only thing we know about Gypsy's past is that she was found in a barn in Echo Bay. To whomever found her and brought her to the Humane Society, I will never be able to thank you enough. She is our treasured cat, companion and cuddle buddy. Life just wouldn't be the same without her.
