

Hey there! Just wanted to thank you again for our wonderful dog Harley! It's been five years now and life wouldn't be the same without him! He's changed abit more with age as he has hip dysplasia. He still barks at everything dogs, squirrels, plastic bags, you name it! he still does not like any other animal of any variety.... Except for his new brother screech! (pure bred newfie) They are inseparable! He spends alot of time snuggling with us and makes it known if he or screech need anything. They are now partners in crime. Here is a few current photos of him now. -Jess & Ross
