

“Our family adopted Remi on the May long weekend in 2019 when she was 9-years-old. She had surgery that summer for a torn ligament in her back leg and she has been like a giant puppy ever since! She loves walks, new toys, barking out the window at passerby’s, and most importantly, food. She tolerates her younger puppy brother but loves to play in the snow with him. She will be 15 this year and we hope to have more birthdays with her. She brings us joy every day! She is still full of spunk and shows us endless love. Never forget about the older dogs at the shelter, they can still live such long and happy lives.”
