

We adopted Trigger (Will) and Luna (Raven) about a year apart from each other. We adopted Luna in 2010 and Trigger in 2011. They are both part of the family and we have no clue what we'd do without them. Both our fur-babies have had some medical trouble, Luna was diagnosed with a genetic urinary issue which caused her to develop bladder stones, she became very ill and we weren't sure if she would make it, luckily after 3 surgeries the team at Animal Hospital was able to get her all better! Trigger had kennel cough when we got him which turned into asthma. Even though our animals take a little extra care we love them all the same! Our lives wouldn't be as amazing without them.
